Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawing are objected to because the claimed channel is not labeled if it is shown.

Specification

The specification is objected to because the word channel is not in the specification.

Claim Objections

Claims 1-9 and 10 -18 are objected to because of the following informalities: The word “channel” in lines 2 and 6 of independent claim 1 and in independent claim 10, lines 9,11 does not have antecedent basis in the specification.

Dependent claims 2,6,7,11, and 15 also include the word channel and are further objected to.

Most claims that have the word channel have not been further treated on the merits.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As understood, claims 1- 4, are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,270,911 to Maglica et al. or USPN 4,688,705 to Miree.

As understood, claims 6-9, are rejected under 35 U.S.C. 102(b) as being anticipated USPN 4,688,705 to Miree.

Art Unit: 2875

Both Miree and Maglica et al. disclose assemblies for removably receiving and supporting a flashlight comprising at least one mounting bracket and means for attaching said mounting bracket to a mounting surface

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

As understood, claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by USPN 6,612,714 to Morre et al.

Morre et al. discloses a belt clip and mounting receptacle for a flashlight including the combination of a flashlight and an assembly for mounting a flashlight.

Regarding claim 10, In combination, flashlight (15) and assembly for mounting (40) flashlight comprising: flashlight, a housing(18), a clip(20), mounting assembly, means for attaching said mounting bracket to a mounting surface

a mounting channel (49) having a first side (43), a second side (44) and a raised central portion (99) between said first and second sides,

at least one mounting bracket (50,51) connected to said mounting channel,

means (52,53) for attaching said mounting bracket to a mounting surface;

Art Unit: 2875

said flashlight being attached to said mounting assembly wherein said second end of said clip is slideably received in said central portion of said mounting channel (figure 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 9-18, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 5,270,911 to Maglica et al. or USPN 4,688,705 to Miree in view of USPN 4,881,155 to Gahagan.

Both Miree and Maglica et al. disclose assemblies for removably receiving and supporting a flashlight comprising at least one mounting bracket and means for attaching said mounting bracket to a mounting surface.

Neither USPN 5,270,911 to Maglica et al. or USPN 4,688,705 to Miree include a magnet and a clip. Gahagan in a multipurpose flashlight teaches the use of both a magnet and a clip.

Regarding claims 5 and 9, according to claim 1, further including a magnet, flashlight and clip

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Miree or Maglica with a magnet as taught by Gahagan. The purpose

Art Unit: 2875

of the magnet is to enable the flashlight to be easily magnetically mounted to any suitable nearby surface and the purpose of the clip is to make the flashlight attachable to a user.
